🔗 LeetCode

SUMMARY

Full Stack Developer & AI Engineer with a strong foundation in Computer Science (B.Tech CSE, Nirma University, CGPA 8.42), specializing in Agentic AI, Deep Learning, and full-stack web development using React, Node.js, and Python. Hands-on experience building end-to-end projects — including an autonomous deep-research agent, an ML-based movie recommender, and algorithm visualizers — with strong fundamentals in DSA and competitive programming. Completed certifications in Machine Learning (Stanford & DeepLearning.AI) and Agentic AI Engineering (Udemy), reflecting continuous, hands-on upskilling in modern AI systems.

EDUCATION

Nirma University **2024 – 2028 (3rd Year)**
B.Tech, Computer Science & Engineering – CGPA: 8.42 *Ahmedabad, India*
• 2× Academic Scholar Certificate holder

Mauni Ankur School of Science **2024**
H.S.C. (GSEB Science) – 93% aggregate *Surat, India*
• GUJCET Score: 111.5 / 120

PROJECTS

- **Deep Research Agent** | live demo | 🏠 GitHub | Agentic AI, LLMs, MCP, Automation **Jul 2026**
 - Built an **autonomous agent** that plans, searches, and synthesizes answers to complex queries using **Agentic AI, LLMs, and the Model Context Protocol (MCP)**.
 - Deployed as a live web application with an interactive interface for real-time query submission and automated, source-backed report generation.
- **Movie Recommendation System** | live demo | 🏠 GitHub | Python, ML, Recommender Systems **Mar 2026**
 - Developed a **content-based ML recommender** in Python that suggests movies matching user preferences using similarity scoring.
 - Preprocessed and vectorized movie metadata, then deployed the model as a live web app for real-time recommendations.
- **MazeLab** | live demo | 🏠 GitHub | JavaScript, Algorithms, DSA **Jun 2026**
 - Built a **maze generator and pathfinding visualizer** to demonstrate graph search algorithms (DSA) running step by step in the browser.
 - Implemented multiple pathfinding algorithms with adjustable grid size and animation speed for step-by-step visualization.
- **Snake Game** | live demo | 🏠 GitHub | JavaScript, Canvas, CSS **Jul 2026**
 - Rebuilt the classic Snake game for the browser with grid-based movement, collision detection, and a live score tracker.
 - Deployed the game as a live, responsive web app playable directly in the browser.

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript
Web & Backend: HTML5, CSS3, React, Node.js
AI / ML: Agentic AI, Deep Learning, Machine Learning, LLMs
Database: SQL, MySQL, MongoDB, PostgreSQL, DBMS
Core Strengths: Problem Solving, DSA & Competitive Programming, Critical Thinking

CERTIFICATIONS

- Machine Learning Specialization – Stanford University & DeepLearning.AI
- AI Engineer Agentic Track: The Complete Agent & MCP Course – Udemy (Instructors: Ed Donner, Ligeny)
 - 21.5 hours · Completed July 2026

INTERESTS

Competitive Programming (LeetCode, Codeforces) and exploring AI/ML research. Enjoy solo traveling and playing chess in free time. Passionate about reading tech blogs and contributing to open-source projects.
